Executive Summary

Improvement of existing Nagdhunga-Naubise-Mugling (NNM) road (94.7 km) and upgrading of Kamala-Dhalkebar-Pathlaiya (KDP) road (130 km) has been proposed under Nepal Strategic Road Connectivity and Trade Improvement Project (SRCTIP) with the support of World Bank (WB). The NNM road is located within three districts; Kathmandu, Dhading, and Chitwan of Bagmati Province and KDP road is located within five districts; Dhanusha, Mahottari, Sarlahi, Rautahat and Bara of province two. Currently, Department of Road-Development Cooperation Implementation Division (DCID) and Geo-Environment and Social Unit (GESU) have only limited number of staffs. To carry out project activities smoothly, dedicated project management unit (PMU) has been recommended in DoR’s E&S capacity report with adequate staffs and facilities. Periodic Maintenance of Road is also included in the project.

Labour Management Procedure (LMP) needs to be prepared in line for proper management of the labour in the project. The major aim of LMP is to identify the labour requirements and associated risks with mitigation plans. The project determines needful resources and enhance capacity on clear understanding of the requirements and procedure for legal compliance as stipulated in labour act 2017, labour rule 2018, applicable collective agreements and World Bank Environment and Social Standards (ESSs), especially ESS-2: Labour and Working Conditions and ESS-4: Community Health and Safety.

During construction, the project involves major activities like excavation; cutting; filling, concrete work; asphalt work; retaining; compacting; metal work. The NNM road project has estimated the engagement of approximately 741,635 man/days of skilled and 3,711,633 man/days of unskilled workers and different types of machinery/equipment, material and technologies from different sources whereas in KDP road, it is estimated the engagement of approximately 1,208,943 man/days of skilled and 2,889,556 man/days\(^1\) of unskilled workers and different types of machinery/equipment, material and technologies. At this stage, the quantity of labour use of Periodic road maintenance can’t be estimated since no subcomponent can be identified. LMP applies to all three types of workers such as direct workers, contracted workers and primary supply workers\(^2\). Workers may be full-time, part-time, temporary, seasonal or migrant workers including national or international; male or female workers, with minimum age of 18. Status and construction practices at the vicinity have been obtained through desk review of available resource material and field consultation with concern project related parties. The possible labour risks are accidents or emergencies due to hazardous works. Similarly, migrants or seasonal workers, child labour or forced labour are other possible risks. The working condition such as occupational health and safety requirements; inadequate worker accommodation; discrimination at employment, sexual exploitation and abuse (SEA); gender-based violence (GBV); work related diseases; non-payment of wages, benefits and the liability; labour influx; road traffic accidents; and human trafficking. The measures essential for the labours are contract management; labour and working conditions; capacity building and additional training and record of worker’s grievances.

Legal compliance might be the challenge for the project implementation. Terms and condition related to labour and occupational health and safety (OHS) stipulated in labour act 2017 are the national legal instrument whereas ESS-2 as requirement of the WB. However, the mandatory

\(^1\) This is the initial estimation and details can be obtained during detail design

\(^2\) The community workers are not applicable in case of SRCTIP project
The provision of responsible staffs and members as well as relevant policies and procedures has been the good initiation. Clear obligation and responsibility have been developed for entire project and project parties including safety and health specialist and support staffs. The legal compliance and its demonstration will be done through terms and condition for labour; contract management; grievance redress mechanism; collective bargaining agreement; emergency preparedness and management plan; age of the employment; workers camp operation guidelines; information disclosure; disciplinary procedures; GBV action plan; management plan for security at work by external threats; and code of conduct. Major concerns have been identified for the LMP process.

LMP is the obligatory requirement for the project and project parties and needs to comply all the related national, local and international provisions.

Project management unit (PMU) will be established under DCID to implement the overall requirement of LMP. Health and safety specialist including safeguard personnel and labour management expert and Gender expert will be hired to support PMU on the implementation of safeguard compliance and compliance of this LMP. The capacity of the staffs will be enhanced through additional specialized training and practical exposure. The organizational coordination and communication mechanism will be developed including harmonic relationship between public - private organization. A standard mechanism for monitoring and performance appraisal will be developed and conducted through checklist, scoreboard and self-evaluation sheet both for project and staffs. The contractors are obliged to comply all requirements and demonstrate its effectiveness. Monitoring and evaluation will be done regularly from PMU, construction supervision consultant (CSC), labour office and other vigilance organization to rate the work performance and effectiveness.

1. Introduction

The Government of Nepal (GoN) has requested the WB to support the improvements of existing NNM and KDP roads for the vital importance to the country’s economy and regional connectivity. The current project is to upgrade the existing NNM road section (94.7 km) trade corridor, connecting Kathmandu and Birgunj and KDP road (130 km) of the Mahendra Highway from 2-lane to 4-lane. The present report deals with the LMP of NNM road project, located in Kathmandu, Dhading, and Chitwan district of Bagmati province and KDP road project located in Dhanusha, Mahottari, Sarlahi, Rautahat and Bara of province 2 of Nepal. The project will also include the periodic road maintenance work. The Labour Management Procedure (LMP) is developed to manage labour and Working conditions’ risks, associated with improvement of Nagdhunga-Naubise-Mugling (NNM) & Kamala-Dhalkebar-Pathlaiya (KDP) Road and periodic maintenance of selected roads, to meet WB’s ESF requirements and respond to Environmental and Social Standards (ESSs, in respect to ESS2 and ESS4) for the SRCTIP funded by World Bank (WB).

The construction sector is a milestone of the development and widely linked to the economic growth of the country (The World Bank) that comprises primarily engaged in the construction, renovation, maintenance and civil engineering works. The sector represents labour intensive public work to create productive assets at community level and provide temporary employment opportunities to beneficiary households, mainly people living under the food poverty line nationwide, not only in on-site construction, but also in construction-related professional services and the supply of materials and resources. Nepal, construction industries (Industrial Policy, 2010) includes new constructions and maintenance/or upgrade of the existing infrastructure related to road, bridge, tunnel, hydropower and building, etc. Likewise, this sector has high diversity in terms of types of work, informal sector of employment, high involvement of temporary/seasonable worker and migrant people, associated workplace risk and health problems that may influence to development indicators; concerned people; deteriorate global environment; and increase project expenditure.

The project’s Environment and Social Impact Assessment (ESIA) of the NNM Road, Environment and Social Assessment (ESA) of KDP road and Environment and Social Management Plan (ESMP) for Periodic Road Maintenance identified key risks and impacts associated with project implementation (e.g. road’s improvement, upgrading and construction of new bridges) relevant to engagement of labours, community health and safety (CHS) and the risks associated with labour influx including Sexual Exploitation and abuse (SEA). The World Bank has rated the overall Environment and Social risk of the project as High, which indicates a high likelihood of adverse impacts associated with project implementation in terms of likely risk on construction workers and CHS.

The high-risk rating indicates that the risks are required to be well understood and expected to have potential impact as they would require appropriate possible efforts to be avoided, minimized or managed through procedures, including procedures set out in this Labour Management Procedure (LMP). However, SRCTIP is committed to, on a continuous basis, throughout the project, evaluate risks and impact to have in place adequate measures and procedures to manage adverse impacts.

The LMP will be applied to all types of workers that will be employed by the SRCTIP and the primary suppliers of the project. Adhering to these procedures, Contractors will be required to prepare LMP for contracted workers for larger works. For smaller contracts, SRCTIP will prepare
specific procedures to be inserted in the contract as part of contractors’ legal obligations. The approach will be assessed as part of the initial screening of environmental and social risk and impact carried out by SRCTIP’s Project Coordination Unit (PCU).

Following to this procedure, the project contractors will be required to prepare LMP as part of bidding document.

1.1. Overview of Labour Use in the project

Management of Labour and Working Conditions and CHS are the crucial components of the construction management which have been stipulated in World Bank Environment and Social Standard (ESS) -2, ESS-4 and Labour Act (2017). This essence realize the project and project parties (including the project proponent and the project implementing agencies) to develop LMP in order to identify the main labour requirements and risks associated with the project, and also to determine the resources necessary to address project labour issues and enabling different project-related parties, for example, staff of the project implementing unit, contractors and sub-contractors and project workers, to have a clear understanding of the requirements on a specific labour issue complying the requirements of labour act, applicable collective agreements and ESS-2 (Labour and Working Conditions) and ESS-4 (Community Health and Safety) for the proper management of the project. This also includes general condition of contract and special condition of contract agreement for all kinds of subcontract work and intermediaries’ involvement, if applicable during the project. The timing of the employment differs according to the nature and volume of the project activities.

The LMP applies to all types of workers to be engaged by the project whether they are full-time, part-time, temporary, seasonal or migrant workers. Also, this applies to all local workers, female workers, and others national or international migrant workers considering the minimum age of 18. The LMP is applicable in accordance with the labour act 2017, labour rule 2018 and ESS2 to the project in following manner:

i. People employed or engaged directly by Department of Road (DoR) to work specifically for this project (Direct Workers);
ii. People employed or engaged by contractor or sub-contractors to implement work (Contracted workers); and contracted through labour suppliers;
iii. People employed or engaged as primary suppliers (PS) (e.g. construction material suppliers-cement, brick, iron, steel, stone, sand manufacturing; fuel suppliers; and commodity suppliers)
iv. Due to the nature of the project SRCTIP will not use community workers

1.1.1 Labour Requirements at DoR-DCID

Department of Road - Development Cooperation Implementation Division (DoR-DCID) and Department of Road - Geo-Environment and Social Unit (DoR-GESU) has the limited number of staffs to carry out their routine activities. Additional number of direct workers of different types will be arranged for the PCU and GESU for the implementation of environmental, social, occupational and community health and safety issues including planning, monitoring and performance appraisal.
**Direct Workers**

Direct workers will be divided into three major units. Firstly, the PCU, then Project-based Staffs and finally, Permanent Staffs. The PCU will employ consultants and support staff who are working on contractual bases as part of the PCU as listed below. Terms and conditions of these consultants are guided by prevailing the public procurement act (2007) and Labour Law (2017). The consultants will be engaged by the project to undertake short period assignments as necessary. The consultants are guided by specific contractual agreements between them and the SRCTIP.

The health and Safety requirements in the LMP will also applies to Civil servants those seconded in the project implementation.

- Project Technical Team
- Environmental Safeguard Advisor
- Social Safeguard Advisor
- OCHS and Labour Management Specialist
- Environmental Safeguard Specialist
- Gender Specialist
- Social Development Specialist
- Procurement Specialist
- Administrative and Financial Officer

In addition to that Construction Supervision Consultant (CSC), Contractors and other respective professionals as part of project team consider direct worker.

**Timing of labour requirements:** Direct workers are eligible to work for a fixed contract period of not more than 1 year. Contracts will be renewed for another/next year based on satisfactory work/service performance. Construction Supervision Consultant will be engaged to calculate labour requirement and time schedule of the construction works. The timing and frequency of labour will depend on the nature of work. The day schedule of work will be 8 hour/day (48 hour/week). The consultant will be on board before the award of contract by DoR-DCID.

### 1.1.2. Labour Requirements: Pre-construction and Construction work

**Contracted Worker**

Based on the scope of works involved, the PCU will employ or engage one main contractor for carrying out the overall implementation of the works with required subcontractors for the supply and installation of materials and various equipment where different staffs (technical and non-technical) and workers (skilled/unskilled) are involved. The contractors will hire contracted workers based on their level of skills and project needs. The workers will be...

---

3 A “direct worker” is a worker with whom the Program has a directly contracted employment relationship and specific control over the work, working conditions, and treatment of the project worker. Where government civil servants are working in connection with the project, whether full-time or part-time, they will remain subject to the terms and conditions of their existing public sector employment agreement or arrangement, unless there has been an effective legal transfer of their employment or engagement to the project.

4 A “contracted worker” is a worker employed or engaged by a third party to perform work or provide services related to the core functions of the project, where the third-party exercises control over the work, working conditions, and treatment of the project worker.
hired from the authorised supply channel as stipulated in Labour Act (2017) registered under Department of Labour and Occupational Safety (DoLOS) and may also hired through NIKEE. DoR detail design estimates that NNM road section involves approximately 741,635 man-days of skilled and 3,711,633 man-days of unskilled workers and KDP involves approximately 1,208,943 man-days of skilled and 2,889,556 man-days unskilled workers to implement the project as part of contract workers. At this stage, the quantity of labour use of Periodic road maintenance can’t be estimated since no subcomponent can be identified.

The following labours are required for day schedule work and remain engaged till the completion of construction work:

- Professionals (Project Manager, Site Engineer, Quality control engineer)
- Safety and health officers
- Logistic and facility officer
- Monitoring and supervision officer
- Administrative officer
- Information officer
- Finance Officer
- Manual labourers (Operator and Driver, Skilled and Unskilled worker)

**Timing of labour requirements:** Contracted workers are eligible to work for a contract period fixed by the PCU, and then recruited by the Contractors. Their contracts will be renewed, if required, based on satisfactory work/service performance. The above estimated numbers of contracted worker will be placed at different locations depending upon the demand and nature of the job. The timing and frequency of labour will depend on the scope of the work. The day schedule of work will be 8 hour/day (48 hour/week). The proposed workers will be mobilized after contract award.

**Primary Supply Workers:** Based on the requirement in every component primary supply worker will be recruited by the suppliers as required. The PS such as material supplier’s workers recruited by suppliers (in the context of Nepal in general especially in transport sector primary suppliers who supply bricks, stone, cements, wood, bitumen, iron rods, planting materials)

**Timing of labour requirements:** The tenure of the PS workers service will be based on supplies as procured. Their contracts will be renewed, if required, based on satisfactory work/service performance. The PS workers will be engaged at different places depending upon the demand and nature of the job. The timing and frequency of labour will depend on the scope of the work.

2. **Objective of LMP**

The objective of present LMP is to promote proper worker management relationships and enhance the development benefits of a project by treating workers in the project fairly and providing safe and healthy working conditions for the project sustainability. Considering the facts, WB-ESS2 on Labour and Working Conditions and Labour Act, 2017, has set following specific objectives:

- To promote safety and health at work.
- To promote the fair treatment, non-discrimination and equal opportunity of project workers.

---

5 A “Nikee” is a leader of the group of the workers who will depute or supply construction worker. This is practiced in most of the places of nepal especially in construction project.
To protect project workers, including vulnerable workers such as women, persons with disabilities, children (of working age, in accordance with this ESS2) and migrant workers, contracted workers, and primary supply workers, as appropriate.

To prevent the use of all forms of forced labour and child labour.

To support the principles of freedom of association and collective bargaining of project workers in a manner consistent with national law.

To provide project workers with accessible means to raise workplace concerns.

3. Assessment of Key Potential Labour Risks

The main labour risks associated with the upgrading of NNM & KDP road and maintenance of other road projects are risk of accidents and incidents at the workplace, labour influx and associated community health and safety risks, including SEA risks. Based on current conditions in the sector it is assessed that the risk of a child or forced labour is not significant, and prohibited by national legislation.

**Occupational health and safety.** OHS risk is likely to be high based on previous project experience. The expected risks relate to potential for injury, traffic-related accidents, fall from height, poor working and living conditions of workers, and lack of PPEs.

The key potential OHS risk associated with construction and operation stages are listed below.

- Hazardous work and process: risk due to working at heights or in confined spaces, use of heavy machinery, or use of hazardous materials.
- Accidents or emergencies: exposure to unsafe machineries, flammable chemicals/fuel, construction materials, landslide at workplace.
- General understanding and implementation of occupational health and safety requirements. Work related diseases (e.g. Allergies, Respiratory problems, Muscular-skeletal disorder, Eye problem), communicable diseases including Sexually Transmitted Infections (STIs).

**Child and Forced Labour:** The project has the insignificant risk of child labour which will be mitigated through certification of labourers’ age. This will be done by using the legally recognized documents such as Citizenship Card (workers 16 years above) and Birth Certificate (below 16 years). Further, awareness-raising programs will be conducted regularly to the communities to sensitize on prohibition and negative impacts of child and forced labour. However, in practice in some sector of works there might be the risk of the non-compliance.

**Labour influx:** Given the employment and supply chain opportunities that will be created from the project, labour influx in project area is expected and assessed as substantial risk. The prevalence of such risk might be due to the engagement of migrants or seasonal workers. The focus of the current project’s operational procedure is to localize the economic benefits with minimal opportunities for outside labour to service work that require specialized/skilled labour that is not present in project localities. The priority for local labour (based on skill, experience, capacity) is expected to minimize the risk of influx., where there is a requirement for special skills. For external workers, proper labour camp will be established for worker accommodation at project site. Specific requirements to manage risks associated with labour influx, related to the interaction between project workers and local communities, such as communicable diseases and gender-based violence, most specifically sexual exploitation, abuse and sexual harassment, will be managed through contractual requirements, code of conduct and training set out in this document. These procedures are guided by Labour Act (2017) and ESS2.
Gender-based violence: GBV risk assessment for the project is rated as substantial, indicating the potential for labour to create or exacerbate patterns of GBV, SEA risk. Construction workers are predominantly younger males. Those who are away from home on the construction job are typically separated from their family and act outside their normal sphere of social control. This can lead to inappropriate and criminal behaviour, such as sexual harassment of women and girls, exploitative sexual relations, and illicit sexual relations with minors from the local community. A large influx of male labour may lead to an increase in exploitative sexual relationships and human trafficking whereby women and girls are forced into sex work.

Human Trafficking: Trafficking in persons is defined as the recruitment, transportation, transfer, harbouring or receipt of persons by means of the threat or use of force or other forms of coercion, abduction, fraud, deception, abuse of power, or of a position of vulnerability, or of the giving or receiving of payments or benefits to achieve the consent of a person having control over another person, for the purposes of exploitation. Women and children are particularly vulnerable to trafficking practices. Some of the sub-project are located near the Nepal-India boarder area where the occurrence of human trafficking is existing. The project will enforce stringent requirements to ensure the contractor, sub-contractors, labour suppliers (Nikee) will not hire trafficked workers. These requirements will be spelled out in the bidding document, contract and C-ESMP.

4. Overview of Labour Legislation: Terms and Conditions

The fundamental right of the labour management begins with the constitutional right stipulated into constitution of Nepal, 2015 through various articles such as the right against exploitation (article 29); the right to a clean and healthy environment (article 30); rights to fair labour practice including appropriate remuneration, facilities and contributory social security (article 34) Policies relating to labour and employment (article 51).

<table>
<thead>
<tr>
<th>WB ESS</th>
<th>Gaps</th>
</tr>
</thead>
</table>
| ESS2: Labour and Working Conditions | • The Labour act 2017 encompasses OHS legal provisions (Section 12) mostly related to manufacturing industries and only few special provisions for construction sectors have been stipulated.  
• Construction related work standards and compliance have not been developed and lack of procedures for performance appraisal.  
• The Labour Act does not specifically require that development be assessed and reviewed in terms of labour and working conditions including OHS requirements before approval  
• The Labour Act does not require development projects to prepare Labour Management Plans/Procedur or OHS Plan. |
| ESS4: Community Health and Safety | • Labour Act 2017 have not clearly illustrated the provision for CHS, rather have highlighted to avoid the discharge of harmful substances and waste to the community. |
More specifically, the Labour Management Provisions has been reflected in Labour act, 2017, Labour rule, 2018, Child Labour (Prohibition and Regulation) Act, 2056 (2000) and ESS 2, paragraph 11 (i.e. wages, deductions and benefits) to ensure right, interest, facilities and safety of all forms of labours. This aims to establish harmonic relationship among employer and workers as well as good culture of work. The glimpse of the legal obligation as term and condition applicable to LMP are:

- Fundamental provision of labour against engagement of force labour, child labour at work, discrimination and equal pay at work.
- Provision for employment for five categories of employment based on the time and nature of work,
- Provision of employment contract for all types of labours. This include (a) nature of employment, (b) primary work of the Employee and his/her position, (c) statement that the Employees' Service Rule will be integral part, (d) remuneration or wages, (e) overtime, compensation and benefits, (f) terms of the employments of the Employee (g) date, time and schedule of work, (e)payment mode and such other matters as prescribed, (f) rest per week, annual holiday and sick, maternity and family leave, as required by national law and labour management procedures
- Provision of part time work and social security for the workers
- Provisions for issuing work permit for foreign labour
- Provision for labour supply and the responsibility of the suppliers towards labour. This states employer must obtain the workers from licensed labour supplier. If outsourced workers are not from the licensed labour supplier, they are deemed to be workers of the main employer. The employer should ensure the workers are provided minimum remuneration and facilities as per this act.
- Fundamental provision on Occupational Health and Safety (OHS)including role and responsibility of suppliers and manufacturer.
- Provisions for special types of industries and facilities provided.
- Provisions for good culture of work, and discipline at work and performance for labour
- Provision against harassment, and sexual abuses.
- Provision for collective bargaining.
- Provision for labour audit for each workplace.
- Provision against harassment, and sexual abuses.
- Provision for collective bargaining.
- Provisions for fair and unfair reasons for termination of employment. This includes written notice of termination of employment and details of severance payments in a timely manner

Moreover, the Child Labour (Prohibition and Regulation) Act, 2000 is the main legal expedient to prohibit engaging children in factories, mines or similar risky activities and to make necessary provisions with regard to their health, security, services and facilities while engaging them in other activities. Under the Section 3 of the Act, child having not attained the age of 14 years is strictly prohibited to be engaged in works as a labourer. Equally, under Section 4, engagement of child in
works as a labourer against his/her will by way of persuasion, misrepresentation or by subjecting him/her to any influence or fear or threat or coercion or by any other means is prohibited. Under Section 6, in case any Enterprise, engaging a child in works, must get an approval from the concerned labour office (LO) or any authority or official prescribed by that office and form the fathers, mother or guardian of the child.

The Labour Act (2017), has clearly described all things related to labour and workforce including wage and salary, termination, redressing, work environment, female worker, recruitment, unionization, child labour and so on. The salient features of Labour legislative provisions are as follows-

**Work hours:** Working hours continue to be 8 hours a day and 48 hours a week as per article 28 of The Labour Act, (2017). Overtime has been increased to 24 hours per week from 20 hours a week. The act provides arrangement for transportation while engaging female worker for the extended period after the sunset.

**Wages:** The term "Wages" means all economic benefits including salary, any bonus, and remuneration for overtime work, holiday or leave, termination of employment or other additional remuneration payable under the terms of employment. Every employer is responsible for the payment of wages to labourers employed by them. In the case where the wages of a worker employed by a contractor are not paid by the contractor, the wages must be paid by the employer of the establishment. The maximum wage period is one month. The wages of every worker must be paid before the expiry of the 7th working day after the last day of the wage period in respect of which the wages are payable.

Public sector labourers’ wages are set by the National Pay and Wages Commission and may not be disputed. In the private sector, wages are set by the industry, and collective bargaining rarely occurs due to high unemployment and labourers’ concerns over job security. The legal workweek is 48 hours, with one day off mandated.

The Ministry of Labour, Employment and Social Security has recently prescribed the minimum remuneration/wage of the workers is NRs 13450.00 under article 106 of the Labour Act, 2017, by publishing a notice in Nepal Gazette (Volume 68, August 16, 2018 (2075-04-31) Number 20) on Aug. 16, 2018 (2075-04-31) (“Gazette Notice“). In addition to the Minimum Wage/Remuneration, Provident Fund and Gratuity will be provided in accordance with the Labour Act and Contribution Based Social Security Act 2017 and other applicable prevailing laws.

Where the employment of a worker is terminated by retirement or by the employer, whether by way of retrenchment, discharge, removal, dismissal or otherwise, the wages payable to him must be paid before the expiry of the 30th working day from the day on which his employment is so terminated. Wages have to be paid in legal tender, through cheque and in some cases (given the requirement of the labourers) through an electronic transfer in favour of the bank account of the worker or through any other digital medium. Wages must be paid on a working day. No deduction can be made from the wages of a worker except those authorized by the Labour.

**Workers union:** The Labour Act, (2017) entrusted the right of labour to involve or affiliation to the trade union organization. The law also provides the provision of formation of trade union where the number of workers exceeds 10. The committee formed in accordance with such provisions will be responsible for collective bargaining agreement and is authorized to submit collective demands, negotiate and settle the demand, among other things. The act also entrusts to form a Labour relation
committee comprised of management and workers where more than ten labours are employed for handling and settlement of workplace issues. The discrimination will not be accepted against developing alternative mechanisms to express their grievances and protect their rights regarding working conditions, terms of employment as well as collective bargaining or alternative mechanisms.

**Regular leaves and benefits:** According to Labour Act, (2017), every worker must enjoy paid sick leave, casual leave, and festive holiday, mourning leave. The labourers would get festival allowances as per the rules. The Act has also made it compulsory maternity leave from 2 weeks before the delivery up to at least 6 weeks after the delivery.

There have been also major changes in the terminal benefit provided to the workers such that the benefits are provided to each labourer irrespective of length of service or nature of employment. The act provides the provision of terminal benefits to the permanent and for certain benefits such as gratuity the worker should have completed certain year of services. There have been also changes in the benefits such as rate of gratuity and leave encashment etc.

**Maternity/Paternity leave:** According to Labour Act, (2017), female worker will get paid maternity leave. An expectant mother would be entitled to 98 days maternity leave. Full paid up to 60 days after submission of the necessary documents. The act also has a provision of the 15 days fully paid paternity leave.

**Safe work environment- Health/ Safety/ Welfare:** The Labour Act, (2017) entrusts to constitute a Safety and Health Committee where 20 or more workers are engaged (article 74). Also, the employer shall constitute the Collective Bargaining Committee (article 116) where 10 or more workers are engaged in the entity. This act also ensures worker safety, health and resolving any kind of disputes and unfairness.

**Social Security:** The Labour Act, (2017) requires the retirement fund such as (a) gratuity, and (b) provident fund to be deposited in the Social Security Fund. Contributory based Social Security Act, 2017 for different type of benefits including accidental and maternity.

**Notice periods:** The Labour Act, (2017) made provision on the termination of employment voluntarily by submitting a resignation letter. The employer must approve the resignation within 15 days and provide a notice thereof to the worker. Even if the employer does not approve the resignation, the resignation becomes effective on the next day of the expiry of the 15days time. However, if the worker continues to work in the entity even on the effectiveness of resignation in such situation the resignation is deemed cancelled.

Termination is considered a “discharge” in the case that a worker is fired for reasons of mental or physical incapacity, illness or other reasons not related to misconduct by the worker. An employer must pay compensation when a termination is unrelated to discharge or dismissal and must give justification when they do terminate on grounds of discharge or dismissal.

The act (article 132) also prohibits the sexual harassment and violence in the workplace. If anyone found to be involved in the sexual misconduct the service may be terminated on the basis of seriousness of offence.

**Non- Applicability of the Act:** The Labour Act, (2017) as per article 180 is not applicable to the following entities:

- Civil Service
• Nepal Army, Nepal Police, Armed Police force.
• Entities incorporated under other prevailing laws or situated in the Special economic Zones to the extent separate provisions are provided.
• Working journalists, unless specifically provided in the contract.

The project needs to introduce the practices to develop standards code of conduct (CoC), condition of contract agreement by including all legal clauses, collective agreements and other special terms and condition for each labour, service providers, contractors, sub contractors and other project parties.

5. Overview of Labour Legislation: Occupational Health and Safety

The special provision related to OHS and working condition has been stipulated in the section 12 of Labour Act, 2017 and section 7 of Labour Rule 2018, ESS 2 (labour and working condition) and The IFC General EHS Guidelines 2007. The provisions are made to protect the labour and concerned people at the workplace against hazards to safety and health arising in connection with the activities. This act entrusts the employer with the obligation to ensure the safety and health of all its employees, and also to mitigate risks of exposure to any hazards in the workplace.

The legal obligations on OHS, applicable to LMP, are listed below:

• Provision to demonstrate OHS policy at workplace.
• Responsibility of employers towards worker such as information, facility, personal protective equipment and training on all kinds of OHS related training.
• Provision regarding the protection of non-labours such as visitors and others.
• Fundamental provision on Occupational Health and Safety (OHS) including role and responsibility of manufacturer, importer and suppliers for assurance of OHS for their goods and services.
• Provision of non-discrimination based on caste/ethnicity, gender, religion, language, origin and ideology.
• Provision responsible towards employee such as information, facility, personal protective equipment and training on OHS and responsibility of labours for work and use of safety gears.
• Provision for appointment responsible person (OHS Officer) at the workplace for OHS implementation. Under this there will be joint safety and health committee comprising of supervisor and workers at worksite.
• Provision for immediate shutdown of work and machineries in case of severe OHS concern.
• Special provision for OHS for eye protection, protection against harmful chemicals, operation of pressurized machine/vessel, machine guarding, handling/lifting of load, fire protection, provision against fatigue.
• Information to respective Labour Office (LO) against accident, fatality and disease happened due to work.
• Provision for treatment and prevention of communicable diseases.
• Specifies requirements for workplace in terms of health and safety such as: proper cleanliness, passage of fresh air, proper light and temperature, solid waste management, noise control measures, healthy drinking water, bathroom or modern toilet, mandatory medical check-up for the entities undertaking health hazardous activities, provide appropriate time for the lunch to the workers, child care centre for children under three years.
• Provision of onsite first aid and primary health care.
• Provision of accident investigation, inventory of work-related diseases and compensation.

There are basically two components of Community Health and Safety (CHS). One is the physical safety of project communities who are exposed to the project activities during construction and operation, including risks of accidents and risks of violence due to increase in crimes and cultural conflict between locals and migrant population. The other pertains to the exposure and/or increased risks of diseases by the community due to influx of people during construction and operation and due to the changes in the project area, including pollution and ecological change. The physical safety aspects are partly addressed by the OHS provisions of Labour Act. Other laws have specific provisions that address part of ESS4.

**Health and Safety Offences:**

The Labour Act 2017 provides more stringent sanctions for the violation of the provision of such act. The sanctions include fine, imprisonment and both. The authority to impose sanction also depends on nature of violation. As per the act there are three institutions viz; the labour office, labour and occupation safety department and labour court.

If any entity is found of discriminating among the labour, they will be fined up to NRs 100,000 and order to maintain equality may given. Similarly engaging a worker without appointment letter or employment agreement fine up to NRs. 500,000 at a rate of NRs. 10,000 per worker; the order to conclude an employment agreement and provide an appointment letter shall also be given. Likewise, for engaging a bonded labour, imprisonment up to 2 years or fine up to NRs. 500,000 or both. The Labour Court can require the entity to provide such bonded labour with remuneration, allowance and other facilities, as well as to indemnify the bonded labour with an amount double such remuneration, allowance and other facilities.

If the entity does not make health and safety arrangements knowingly and as a result the worker dies or suffers physical or mental injury: Imprisonment up to 2 years, except otherwise provided. Such person suffering the injury should be compensated.

| **Protection of Workers** | Fundamental provisions for workers (article 2)  
Schedule of work (article 7)  
Provisions for internal management of workers (article 17)  
Dispute settlement (article 18 and 19)  
Disciplinary and penalty (article 20) |
| **OSHS** | The law provides for comprehensive OHS (See Annex 1 for details) and empowers Department of Labour and Occupation Safety (DoLOS) to conduct inspections of establishments and to impose penalties for violations or non-compliance (section 12) |
| **Children at Working Age** | No children below the age of 18 can work (section 2, article 5). |
| **Women** | 60 days of paid maternity leave for expectant mothers is mandatory (section 9, article 45) |
| **Person with Disabilities (PWD)** | Person with Disabilities Rights and Protection Act 2013 provides for rights to discrimination-free employment opportunities |
| **Migrant Workers** | No special provisions for migrant workers but provisions for foreign workers (article 6) |
| **Contract Workers** | In the case if the wages of a worker employed by a contractor are not paid by the contractor, the wages must be paid by the employer of the establishment. |
| **Community Workers** | The labour law does not recognize community workers as defined in the ESS2 and hence does not provide any special considerations for such contracting arrangements. The labour act 2017 requires that all labour supply contracting agency will have to be formally registered and workers should first be the responsibility of the contracting agency. |
| **Primary Supplier Workers** | The law does not assign any responsibility to the project on the supplier’s labourers and their working conditions. Workers of suppliers will have to be the responsibility of the suppliers. |
| **Freedom of association and collective bargaining** | Where 10 or more workers are engaged in the entity, employer shall also constitute the Collective Bargaining Committee as per sec 116 of Labour Act 2017 but the government does not permit any collective demand in following area providing |
essential service, or (b) established in Special Economic Zone, (c) state of Emergency declared as per the Constitution.

| Access to a grievance redress mechanism | Workers can seek direct civil law redress from the Labour Courts for complaints regarding terms and conditions employment and wages. While health and safety, maternity welfare and child labour offences are subject to criminal prosecution. |

The contractors have the mandate to comply all the mentioned requirement and also make their employee compatible towards handling and management of entire OHS condition at workplace. This may be ensured through providing the required facilities and develop their capacity. Also, through developing standard commitment paper submitted to contractor during the bid process included into bid documents as mandatory requirements. Additionally, development of OHS management plan and implementation framework needs to be developed.

6. Responsible Staff

The overview of responsible staff and oversight mechanisms has been described in the institutional arrangement of ESIA of NNM and ESA of KDP. The PCU has the overall responsibility to oversee all aspects of the implementation of the LMP, in particular to ensure contractor compliance. The contractor will be responsible to address LMP as part of procurement for works and subsequently responsible to manage LMP provisions. The construction supervision consultant is responsible to facilitate for the implementation of LMP in close coordination to PCU.

The project will form a team of responsible staffs to carry out the following activities:

- engagement and management of project workers
- engagement and management of contractors/subcontractors
- occupational health and safety (OHS)
- training of workers
- addressing worker grievances
- labour camp management
- emergency preparedness plan

**Labour and Working Conditions:**

The contractor (health and safety specialist) will be responsible to develop a comprehensive commitment plan for labour and working condition in accordance with specifications and keep record set up in LMP as discussed: records of workers engaged under the project, including work and workers’ category, contracts, hours worked, remuneration and deductions (including overtime), payment mode, collective bargaining agreements, capacity development plan, workplace code of conduct. And, contractors are obliged to comply with maintain all requirements and keep their records updated. Also, address the provision of labour accommodation, welfare and other workplace facility.

The working schedule for the day will be 8 hour and 48 hour per week. Additionally, the wages, leave, welfare, social security, insurance and safety measures for all employees will be provided as per the provision made available by Ministry of Labour, Employment and Social Security. The discrimination will not be accepted against gender, caste, ethnicity as reflect in labour act 2017.

The DoR-DCID may require records any time to ensure that labour conditions are met. The PCU will review records on a monthly basis and can require immediate remedial actions, if needed. A summary of issues and remedial actions will be included in the quarterly reports to the World Bank. The gross minimum wages and facilities for all category of staffs and workers may applies as listed:

- The executive/professional, experts and specialists by considering procurement policy of WB.
- The support staff by considering the public procurement act, 2007.
- The skilled and unskilled labourers by considering minimum labour wage and benefits as per the labour law.
**Occupational Health and Safety:**

Contractors must engage a minimum of one safety and health officer and joint safety and health committee comprising of supervisor and workers. Smaller contracts may permit the safety representative to carry out other assignments as well. The safety and health representative ensure the day-to-day compliance with specified safety measures and records of any incidents. They will be responsible to comply above mentioned requirements to protect and control of environment, occupational health and safety, community health and safety. This incorporates engineering and management controls to reduce or minimize the possibility and magnitude of undesired consequences when impact avoidance is not feasible. Also, provides technical and financial resources to effectively and safely control accidents, preparing workers and nearby communities to respond on them. Furthermore, applies to ensure implementation of measures to avoid, minimize or rehabilitate risks and impacts on occupational health and worker’ safety.

**Worker Grievances and Disciplinary Procedure:**

Legal provision entrusted on the basics of disciplinary procedures and grievance redress mechanism (GRM) to harmonize working conditions and management of worker relationships (e.g. terms and condition of employment, non-discrimination and equal opportunity, Worker’s organization) and protecting the workforce (e.g. child labour and minimum age, force labour). The GRM in place to receive concerns and grievances from key stakeholders and the public affected by the Project and will address all complaints within a reasonable time, protect against retaliation and allow for escalation of complaints. The GRM mechanism will be applicable as specified in NNM ESIA and for KDP road it will be developed during ESIA preparation. Contractors will be required to present a worker grievance redress mechanism, which responds to minimum requirements in this LMP. Worker grievances will include occurrence date, grievance, and date submitted; actions taken and dates; resolution (if any) and date; and follow-up. The PCU Social Management Advisor will review records on a monthly basis. The PMU will keep up-to-date resolutions and reflect them in quarterly reports to the World Bank. A summary of the grievances received should be included in the monthly and quarterly monitoring reports. If grievances are repeated, unresolved or submitted by several people, this should be escalated to the Unions or Labour Department.

Individual grievance (chapter 18, labour act 2017) appeared during work related to non-compliance of the provision stipulated in will be settled as per the consultation and understanding of employer and labour. The project will have the risk of payment and facilities against individual workers so condition needs to be reflected into the contract agreement.

Collective grievances, disputes and their process to handle (chapter 19, Labour act 2017) provisioned for collective bargaining settlement committee and function based on the terms and condition. If the settlement is not effective and satisfactory, the Department of Labour and Occupational Safety is responsible to carry out. Negotiation and labour tribunal will apply for the settlement. Complaint handling mechanisms (GRM) and plan of action for the management of possible issues will be established. The finding will be communicated for future action as best practices. This applies for direct and contracted workers, and describes the way in which these workers will be made aware of the mechanism.

The contractor should have a SEA/SH mitigation action plan which includes developing a system (GRM) to respond to gender-based violence, sexual exploitation and workplace sexual
harassment-related complaints/issues; GBV awareness in affected communities, making the workplace and labour camps zero tolerance of SEA/SH, CoCs, follow up orientations on SEA/SH to workers etc.

**Additional Training:**

Contractors are required have a separate unit to deal labour and working condition as well as community health and safety with adequate number of Health and Safety officer and support staffs. If training is required, this will be the contractor’s responsibility. The Health and Safety officer will provide instructions to contractor staff.

The DoR-DCID will require for training to address risks associated with construction and labour influx as well as will provide a schedule for required training. The Contractor will be obligated to ensure staff participation for such training, and any additional mandatory training required, as specified by contract to maintaining a safe and healthy working environment. The training and retraining will be conducted at different intervals such as after appointment, annually and if new things happened changed at the workplace (material, technology, procedure, emergency).

**7. Policies and Procedures**

Decisions relating to the employment or treatment of project workers will not be made on the basis of personal characteristics unrelated to inherent job requirements. The employment of project workers will be based on the principle of equal opportunity and fair treatment, and there will be no discrimination with respect to any aspects of the employment relationship, such as recruitment and hiring, compensation (including wages and benefits), working conditions and terms of employment, access to training, job assignment, promotion, termination of employment or retirement, or disciplinary practices.

Most environmental and social impacts of subprojects resulting from activities directly under the control of contractors, and will be mitigated directly by the same contractors. As a consequence, ensuring that contractors effectively mitigate project activities related impacts is the core of the Project. The PCU will incorporate standardized environmental and social clauses including the requirement of SEA Mitigation Action plan and worker Code of Conduct in the tender documentation and contract documents, in order for potential bidders to be aware of environmental and social performance requirements that shall be expected from them, are able to reflect that in their bids, and required to implement the clauses for the duration of the contract. The PCU will enforce compliance by contractors with these clauses.

As a core contractual requirement, the contractor is required to ensure all documentation related to environmental and social management, including the LMP, is available for inspection at any time by the PCU or its appointed agents. Likewise, similar obligations will be required for third party labour suppliers or Nikee. The contractual arrangements with each project worker must be clearly defined in accordance with national law. A full set of contractual requirements related to environmental and social risk and impact management will be provided in ESIA. All environmental and social requirements will be included in the bidding documents and contracts in addition to any additional clauses, which are contained, in the Programs environmental and social instruments.

Under no circumstances, PCU, contractors, primary suppliers or sub-contractors will not engage forced labour. Forced labour includes bonded labour (working against an impossible debt), excessive limitations of freedom of movement, excessive notice periods, retaining the worker’s
identity or other government-issued documents or personal belonging, imposition of recruitment or employment fees payable at the commencement of employment, loss or delay of wages that impede the workers’ right to end employment within their legal rights, substantial or inappropriate fines, physical punishment, use of security or other personnel to force or extract work from project workers, or other restrictions that compel a project worker to work in a non-voluntary basis can be referenced or annexed to the LMP, together with any other supporting documentation. The similar obligation is required for the engagement of child labour.

7.1 Occupational, Health and Safety

To achieve the best OHS performance the DoR-DCID is committed to:

(i) Comply with legislation and other applicable requirements, which relate to occupational health and safety hazards.
(ii) Prevent OHS risks through promotion of appropriate skills, knowledge and attitudes toward hazards;
(iii) Contribute to improve OHS management system and performance during project implementation;
(iv) Develop budgetary plan for OHS improvement including capacity development and performance assessment.
(v) Communicate OHS provisions to all persons, working under control of the PMU with emphasis on individual OHS responsibilities.

The Health and Safety Specialist, Environmental Representative for the workplace or a section of the workplace for an agreed period. At a minimum, the Representative must:

- Identify potential hazards: likely during excavation, operation of construction vehicles such as excavators and dump trucks, operation of crusher plants, operation of quarry sites. Typical health hazards could be encountered during rock cutting, slope cutting, working in bridge over river, equipment handling etc.;
- Collaborate with contractors, investigate the causes of accidents at work place;
- Inspect the workplace, including plant, machinery, technology, project sites and social environment with a view of establishing the safety and health of employees;
- Attend meetings of the Safety and Health Committee, being its member;
- Make recommendations to employer in respect to safety and health matters, affecting the employees.
- Develop capacity building and monitoring plan.
- Develop emergency preparedness and management plan.
- Develop OHS Management Framework and compliance plan.
- Report and record all OHS related issues mainly focusing on the workplace accident.

Workers could encounter injuries and accidents (sometimes casualties) in lack of adequate safety measures. And, project is paying high compensation in terms of human life, economy and society and also, face high burden to the project during construction and operation. Also, lack of capacity and training to workers on safe operation of heavy equipment make job become risky. Other possible health impacts are respiratory and eye diseases due to exposure to dust, and smoke. Similarly, unhygienic sanitary condition e.g. lacking of latrines and washing facilities and unsafe water location increases the chances of additional and often endemic diseases like diarrhoea, dysentery and cholera.
To avoid workplace health and safety issues including accidents and injuries, the Contractor will:

- Develop workplace OHS policy and hazard as well as accident registration and reporting system.
- Provide occupational health and safety training to all employees engaged in work, ensuring protective masks, helmets, overall and safety shoes, and other safety equipment when required;
- Conduct workplace assessment and develop implementation plan.
- Provide workers in dusty and high noise areas with masks and earplugs;
- Ensure availability of first aid boxes;
- Provide employees with access to toilets for male and female and potable drinking water;
- Provide occupational safety measures to workers with specific equipment;
- Properly dispose of solid waste at designated permitted sites landfill allocated by the local authorities and cleaning funds; and attach the receipt of waste from the relevant landfill authority.
- Carry out all procedures to prevent leakage of generator oil into the site.
- Ensure that the head of the well is covered tightly.
- Provide secondary tank for oil and grease to avoid spills.

Additionally, the minor incidents are reported to PCU on a monthly basis and serious incidents are reported immediately. Minor incidents are reflected in the quarterly reports to the World Bank, major issues are flagged to the World Bank immediately.

Further to enforcing the compliance of environmental management, contractors are responsible and liable of safety of site equipment, labours and daily workers attending to the construction site and safety of citizens for each subproject site, as mandatory measures.

7.2 - Labour Influx and Gender Based Violence

Contractors will need to maintain labour relations with local communities through a code of conduct (CoC). The CoC commits all persons engaged by the contractor, including sub-contractors and suppliers, to acceptable standards of behaviour. The CoC must include sanctions for non-compliance, including non-compliance with specific policies related to gender-based violence, sexual exploitation and sexual harassment (e.g., termination). The CoC should be written in plain language and signed by each worker to indicate that they have:

- received a copy of the CoC as part of their contract;
- had the CoC explained to them as part of the induction process;
- acknowledged that adherence to this CoC is a mandatory condition of employment;
- understood that violations of the CoC can result in serious consequences, up to and including dismissal, or referral to legal authorities.

A copy of the CoC shall be displayed in a location easily accessible to the community and project-affected people. It shall be provided in Nepali.

Contractors must address the risk of gender-based violence, through:

- Mandatory training and awareness-raising for the workforce about refraining from unacceptable conduct toward local community members, specifically women. Training may be repeated;
• Informing workers about national laws that make sexual harassment and gender-based violence a punishable offence which is prosecuted;
• Adopting a policy to cooperate with law enforcement agencies in investigating complaints about gender-based violence;

The contractor should have a SEA/SH mitigation action plan which includes developing a system (GRM) to respond to gender-based violence, sexual exploitation and workplace sexual harassment-related complaints/issues; GBV awareness in affected communities, making the workplace and labor camps zero tolerance of SEA/SH, CoCs, follow up orientations on SEA/SH to workers etc.

This process will be under the portfolio of a designated Officer who shall identify and engage the relevant stakeholders on GBV issues.

8. Age of Employment

The Labour Management Procedure in accordance with the labour act 2017 and ESS2 has adopted the standard desk review of related references and reports and legal valid documents followed by the field study by consultation with concerns project and project parties both at central and project alignment site. The mandatory provision of minimum age by law for the hiring of labour is 18 and no children under this age are allowed to work. If any contractor employs a person under the age of 18 years, that contractor’s will not only be terminated but also be reported to the authorities for legal prosecution. Also, the project and project parties will not allowed to involve children in any hazardous work activities prohibited that includes: (a) with exposure to physical, psychological or sexual abuse; (b) underground, underwater, working at heights or in confined spaces; (c) with dangerous machinery, equipment or tools, or involving handling or transport of heavy loads; (d) in unhealthy environments exposing children to hazardous substances, agents, or processes, or to temperatures, noise or vibration damaging to health; or (e) under difficult conditions such as work for long hours, during the night or in confinement on the premises of the employer.

Evidence such as birth certificate or citizenship, monitoring and inspection and other documents need to be produced to demonstrate the age and assurance of complying legal obligation.

9. Terms and Conditions

As stated in section 4 of this LMP the terms and conditions of employment are governed by the Labour Act. The Act makes it mandatory for employers to give its workers a copy of the written particulars of employment, signed by both parties. For this program, contractors will be required to provide all its workers with written particular of employment.

Contractors will also be required to comply with the most current regulation of wages which is issued by the Government and reviewed on a regular basis. The order specifies the minimum wages, hours of work, overtime pay, leave entitlements, travelling and subsistence allowances and the issue of protective clothing.

The act states that before a contractor is awarded a public contract, that contractor is required to certify in writing that the wages, hour and conditions of work or persons to be employed by him on the contract are not less favorable than those contained in the most current wages regulation issued. Where a contractor fails to comply with this requirement, the contract with the contractor may be withdrawn as an approved contractor upon recommendations of the PCU.
In ensuring full compliance with the law in this regard, contractors will be required to furnish PCU with copies of the Written Particulars of Employment or copies of the contract of all its workforce. Contractors will not be allowed to deploy any worker to work in the project if such copy of employment of that worker has not been handed to PCU.

As a monitoring mechanism, the contractor shall not be entitled to any payment unless he has filed, together with his claim for payment, a certificate: - a) stating whether any wages due to workers are in arrears; b) stating that all employment conditions of the contract are being complied with. For this program, it will be a material term of the contract to allow PCU to withhold payment from contractor should the contractor not fulfil their payment obligation to their workers.

The wage, hours of work, maximum no of hours will be applied as mentioned in section four of LMP.

9.1 - Worker’s Organization

The labour act 2017, has protected the right of labour to involve or affiliation to the trade union organization. Besides as a member state of ILO it has the obligatory requirements to applies minimum conditions in terms of workers organization. The Labour Act enacted to give effect to the collective bargaining, amongst other purposes. The Act allows for the collective negotiation of terms and conditions of employment. The discrimination will not be accepted against developing alternative mechanisms to express their grievances and protect their rights regarding working conditions, terms of employment as well as collective bargaining or alternative mechanisms. Labour relation committee comprised of management and workers will be applicable in any workplace where more than ten labours are employed for handling and settlement of workplace issues.

The PCU does not forbid the workers with the right to join and form an organization for purpose of labour representation to negotiate favourable terms and conditions for their members amongst other rights.

10. Grievance Mechanism

In any working environment it is essential for both employers and workers to be fully conversant with all aspects of disciplinary processes, the grievance handling procedures and the legal requirements and rights involved. In implementing an effective dispute management system consideration must be given to the disputes resulting from the following:

- Disciplinary action
- Individual grievances
- Collective grievances and negotiation of collective grievances
- Gender-based violence, sexual exploitation and workplace sexual harassment, recognizing that SEA/SH cases require prompt response with a survivor centric approach (assuring quick access to services, confidentiality, safety, consent, non-discrimination and respect to and of the survivor)

10.1 - Disciplinary Procedure

The starting point for all disciplinary action is rules. These rules may be implied or explicit and of course will vary from workplace to workplace. Some rules are implied in the contract of employment (e.g. rule against stealing from the employer), however it is advisable that even implied rules be included in the disciplinary code or schedule of offences. In an organized
workplace these rules ideally are negotiated with the trade union and are often included in the Recognition Agreements signed by the employer and trade union. These workplace rules must be:

a. Valid or reasonable;
b. Clear and unambiguous;
c. The worker is aware, or could reasonably be aware of the rule or standard; and
d. The procedure to be applied in the event the worker contravenes any of these rules.

The PCU will establish a fair and effective disciplinary procedure in the workplace, as follows:

a. Conduct an investigation to determine whether there are grounds for a hearing to be held;
b. If a hearing is to be held, the employer will notify the worker of the allegations using a form and language that the worker can understand;
c. Worker is to be given reasonable time to prepare for the hearing and to be represented by a fellow worker or a union representative;
d. Worker must be given an opportunity to respond to the allegations, question the witnesses of the employer and to lead witnesses;
e. If worker fails to attend the hearing the employer may proceed with the hearing in the absence of the worker;
f. The hearing must be held and concluded within a reasonable time and is to be chaired by an impartial representative.

If worker is dismissed, it must be given the reasons for dismissal and the right to refer the dispute concerning the fairness of the dismissal. Therefore, it is incumbent upon the Contractors to ensure that they have a disciplinary procedure and Code and standards which the workers are aware of. Each contractor will be required to produce this procedure to ensure that workers are not treated unfairly.

10.2 - Individual Grievance Procedure

Based on Nepal’s country regulations and the requirements of ESS 2, the project will have a formal grievance procedure for workers to submit complaints related to their conditions of their work. The procedure comprises:

a. Specify to whom the worker should lodge the grievance;
b. Refer to time frames to allow the grievance to be dealt with expeditiously;
c. Allow the person to refer the grievance to a more senior level within the organization, if it is not resolved at the lowest level;
d. If a grievance is not resolved the worker has the right to lodge a dispute with the PCU.

All the contractors who will be engaged for the project will be required to produce their grievance procedure as a requirement for tender which at a minimum comply with these requirements. In addition, good international practice recommends that the procedures be transparent, is confidential, adheres to non-retribution practices and includes right to representation. After they are engaged they will be required to produce proof that each worker has been inducted and signed that they have been inducted on the procedure.

10.3 - Collective Grievances and Disputes resulting from the negotiations of Collective agreements

Where a trade union is recognized, it is entitled to negotiate on a regular basis with the employer over terms and conditions existing at the workplace and the employer is obliged to negotiate with
The procedures followed in such instances is usually contained in the agreement, which state how the issues are raised, the procedure for negotiations, the composition of the parties involved in the negotiation and the procedure to deal issues that are not resolved through consensus. In the type of disputes, if the dispute is not resolved at the workplace, the parties to the dispute can utilize the dispute resolutions mechanisms provided for in the labour legislation.

**10.4 - Gender-based Violence, Sexual Exploitation and Workplace Sexual Harassment**

Provisions related to GBV and sexual harassment are stipulated respectively in section 6 and section 132 of labour act 2017. The law states no one shall be discriminated against cast, gender, sex, language, ideology and pay (salary) etc. Also, no one will be sexually abused during work and the action against will be appalled legally and the penalized by termination of job.

The PCU will, with support from consultants, identify institutions and services provides who are actively engaged in prevention of gender-based violence, sexual exploitation and workplace sexual harassment in order to establish a manual for referencing any potential survivors. The project unit and the contractor is not equipped to handle complaints or provide relevant services to survivors, but will reference any person to relevant service providers, including health facilities, law enforcement’s gender unit or others, as relevant using the information on available services. Grievances related to gender-based violence be reported through the project’s GBV GRM, managed by a committee. All SEA/SH related complaints, with the survivor’s consent, will be referenced to the project identified service provider who will further manage the case in a survivor centric approach and will report back to the project GBV GRM once the case is solved.

In addition, the ESIA/ESMP will identify additional mitigation measures through a SEA/SH mitigation action plan which will be reflected in site specific ESMPs, including the contractors ESMP or contractors specific Labour Management Plans, where required. This will include engagement with communities on gender related risks, grievance and response measures available, as identified in the manual.

**11. Contractor Management**

The project may deal with all four different categories of contractor as a part of principal and subcontractor for the construction and operation of the project. Besides, labour and goods suppliers may also involve for supplying required labours, facilities, goods. The project has the major challenge to manage all the contractors and suppliers for hiring, regulating, and termination of the job including role and contract obligation and security in accordance with the labour law and - ESS2.

The project or the project parties has the obligation to develop a standard condition of contract for each category of contract and services. Also make reasonable efforts to ascertain that the Contractor and their subcontractors hire the workers from legitimate labour entities in the country providing the information like business licenses, registrations and permits of the local entities that supply labour to the Contractor and its subcontractors.

Major terms and conditions required for the contractor management are selection process for contractors (paragraph 31); contractual provisions that will put in place relating to contractors for the management of occupational health and safety (ESS 2 paragraph 32 and labour law chapter 12); procedure for managing and monitoring the performance of contractors (paragraph 32); and collective agreements that apply to the project. Additionally, technical, financial and other specific work experience may also apply during contractor management.
The project shall demonstrate and acquire the commitment from respective parties on the conditions as indicated in the section contract management. The Contractor’s Environment and Social Management Plan (C-ESMP) of NNM ESIA will applicable prior to the commencement of construction activities. The C-ESMP shall include OHS plan, Water and Waste Management Plan, Labour Influx management Plan, Workers camp management plan, Traffic and road safety management Plan, Quarry/borrow area management plan, and site restoration plan among others in accordance with the GoN and IFC&WB workers accommodation guidelines.

Also, the contractor will be responsible to prepare and update traffic management plans prior to construction activities. The contractor will construct camps for labour and engineers. The contractor must provide workers with evidence of all payments made, including social security benefits, or other entitlements regardless of the worker being engaged on a fixed term contract, full-time, part-time or temporarily. The application of this requirement will be proportionate to the activities and to the size of the contract, in a manner acceptable to DoR-DCID, WB and local laws and regulations.

The DoR-DCID safeguards team will monitor to contractors and assigned activities, keeping records and reports on terms and conditions as mentioned in labour management procedures, proportionate to the activities and to the size of the contract, including:

- **Labour conditions**: records of workers engaged under the Project, including contracts, registry of induction of workers including CoC, hours worked, remuneration and deductions (including overtime), collective bargaining agreements;
- **Safety**: recordable incidents and corresponding Root Cause Analysis (lost time incidents, medical treatment cases), first aid cases, high potential near misses, and remedial and preventive activities required (for example, revised job safety analysis, new or different equipment, skills training, and so forth).
- **Workers**: number of workers, indication of origin (expatriate, local, nonlocal nationals), gender, age with evidence that no child labour forced labour and no trafficked labour is involved, and skill level (unskilled, skilled, supervisory, professional, management).
- **Training/ professional development**: dates, number of trainees, and topics;
- **Worker grievances**: details including occurrence date, grievance, and date submitted; actions taken and dates; resolution (if any) and date; and follow-up yet to be taken—grievances listed should include those received since the preceding report and those that were unresolved at the time of that report.
- **Emergency and security**: details of risks the contractor may be exposed to while performing its work—the threats may come from third parties external to the project.

The Project’s oversight of contractors to set out the following procedures are currently in place for NNM and KDP contractor management, but have been adjusted to adhere to LMP provisions:

- Ensure that Contractors have valid contracts with clearly define service level agreement in accordance with national guideline and all environmental and social clauses, as applicable.
- Monthly submission of records: Contractor submission to PMU, This includes: Managing incidents and accidents, the Incident Reporting and Investigation Procedure is followed and the Incident/Accident Monitoring Register is used to monitor; and Contractor employees recorded using Contractors Employee List.
- Monthly site visits (at a minimum) and reports. This includes, concerns or issues tracking using monitoring register.
• Evaluation of contractor requirements. This includes training, OH&S files, certifications and other. The evaluation results in Portfolio Reports which includes recommendations for contract extension or termination.
• Training needs identification recorded in Contractor Training Schedule for workers & project parties.
• Annual Contractor Management Plans submitted to PMU.

The performance evaluation will be regularly done through the project team and corrective actions (if required) will be notified to the respective parties.

12. Community Workers

The project is not willing to hire community worker so this is not applicable.

13. Primary Supply Workers

All primary suppliers are formal businesses who are required to procure and produce materials subject to high standards. Any new supplier is identified using a different form which screens the supplier in regard to compliance with taxes, certification, licensing, Public Liability Certificate and workmen’s compensation, company’s permanent staff, and declare any current or prior arbitrations as well as any criminal convictions. Registered suppliers are subjected to regular review in accordance with the applicable law. Additionally, the project has identified nursery plantation, monitoring and supervision, maintenance and security as PS.

According to our preliminary assessment the risk related to primary supply workers the use of forced, labour and trafficked is not significant, no significant safety issue has been identified according to the preliminary screening. The project will ensure that no child and forced labour are hired by PS. If child labour or forced labour cases are identified, the project will require the PS to take appropriate steps to remedy them. During the project implementation if the serious safety issues have identified during project implementation the PCU will required the relevant PS to introduce procedures and mitigation measures to address the safety issues.

LMP require that, under the project, any primary supplier maintains records related to occupational injuries, illness and lost time accidents. These records will be subject to review twice annually and requires and update and the project will ensure, that any primary supplier to the project report fatalities or serious injury, and informs government authorities in accordance with national reporting requirements. The PS will be responsible and committed to demonstrate towards protecting the workforce and maintaining all level of OHS at workplace. Appropriate procedures and mitigation measures to address the safety issues will be introduced and has been reviewed periodically. Furthermore, if in case PS is out of control of the project or project parties’ alternatives will be explored that will be committed to demonstrate the legal compliance. Besides, the project will ensure that no child labour and forced labour are hired by PS. If child labour or forced labour cases are identified, the project will require the PS to take appropriate remedial steps.

The PCU will also ensure, that any primary supplier to the project report fatalities or serious injury, and informs government authorities in accordance with national reporting requirements.

14. Institutional arrangement

A separate dedicated labour and working condition management (safety and health) unit needs to be established under core organizational function. Health and Safety/OHS officer having adequate understanding and experience on Labour and Working condition management will be hired. Also,
required number of supportive staffs and joint safety and health committee at each worksite will be appointed. The core function includes scope of work; staff detail; their role, responsibility and accountability; experience and training; performance appraisal. The unit will responsible to carry out the activities such as: engagement and management of project workers; engagement and management of contractors/subcontractors; OHS; compensation and rehabilitation on workplace accident; training of workers; and addressing worker grievances and disciplinary action. Special provision on condition of contract, monitoring and evaluation and performance appraisal (scoreboard) and budgetary allocation will be practiced. The institutional functioning and performance will be evaluated annually and update accordingly.

15. Coordination and communication

The project will to complete in time with high quality and cost effectively. To accomplish the project needs to develop effective coordination and communication mechanism among project and project parties such as Public- public, public -private, private -private organization will be developed based on the nature and requirement of services. As applicable, memorandum of understanding will be developed and updated timely. Two-way written communications will be applicable for all kinds of notification at each level. Public relation officer will be appointed as Information officer to execute the process.

16. Monitoring and Evaluation

This will be done through setting a special score board approach based on the activities accomplished during project interval. This will be done annually and applies both for the project including project parties and labourers as well based on the set criteria.

## Annexes 2: Suggested Due Diligence for Social and Environmental Mitigation Measures in Contracts

<table>
<thead>
<tr>
<th>Stage of Contractual Process</th>
<th>Suggested Due Diligence</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before bidding</td>
<td>• Ensure that the terms of reference clearly define the supervision engineer’s responsibilities regarding oversight of, and reporting on, labour influx and workers’ camps. For high risk projects, have independent safeguards supervision.</td>
</tr>
<tr>
<td></td>
<td>• Ensure the team skills in the terms of reference clearly include key staff qualified and experienced in managing similar projects, and demonstrated capacity to manage social and environmental issues, including issues pertaining to community health and safety.</td>
</tr>
<tr>
<td></td>
<td>• Ensure that the project GRM is established and its use is widely publicized.</td>
</tr>
<tr>
<td>Preparation of bidding</td>
<td>• Review contract conditions included in bidding documents to:</td>
</tr>
<tr>
<td>documents</td>
<td>(i) Ensure that the relevant mitigation measures in the ESMP are reflected and budgeted in the contract,</td>
</tr>
<tr>
<td></td>
<td>(ii) Ensure the ESMP forms part of, and is explicitly referred to in the bidding documents.</td>
</tr>
<tr>
<td></td>
<td>(iii) Identify relevant provisions (workers, camps, child and forced labour, safety, grievance redress, etc.) regulating the contractor’s responsibility and identify any gaps, inconsistencies or areas of concern that could be addressed through additional provisions in the “particular conditions of contract” and/or technical specifications</td>
</tr>
<tr>
<td></td>
<td>(iv) Include a requirement that all workers sign ‘Codes of Conduct’ governing behavior, and identifying sanctions</td>
</tr>
<tr>
<td></td>
<td>(v) Clearly identify that training programs on implementing the Codes of Conduct, etc. will be undertaken by external providers</td>
</tr>
<tr>
<td></td>
<td>• Ensure the contract conditions clearly specify what type of penalty the contractor will face if the provisions of the ESMP and CESMP are not adhered to—including by sub-contractors. This may include direct incentives to contractors in the form of penalties for poor performance on social and environmental matters or</td>
</tr>
<tr>
<td>Bidding evaluation</td>
<td>After contract signing</td>
</tr>
<tr>
<td>---------------------</td>
<td>-----------------------</td>
</tr>
</tbody>
</table>
| • Review the Borrower’s bid evaluation report and request to review the bids where appropriate, to verify for the recommended bidder that documents related to the ESMP, safeguard implementation capacity, and other obligations of the contractor required to be submitted with the bid are sufficiently detailed and cover the contractual requirements.  
• Require the contractor’s representative or dedicated community liaison staff to have the ability to communicate in the language of the Borrower and/or the local language.  
• Verify that the contract management framework identifies clearly lines of communication and that these are formalized and a consistent record is provided.  
• Ensure that the contractor meets the project’s OHS requirements for capability and experience. | • Prior to commencing works, the contractor submits site-specific CESMP(s) based on the ESMP, which includes specific management plans for: (i) work activities; (ii) traffic management; (iii) occupational health and safety; (iv) environmental management; (v) social management; and (vi) labour influx.  
• Supervision engineer reviews and approves the CESMP—with inputs from appropriate Government agencies—before any works start. For high risk projects, the Bank should also review and clear the CESMP. Borrower should disclose the approved CESMP. |
Annexes 3: Code of Conduct

Preamble
The DoR-DCID Code of Conduct defines labour standards that aim to achieve decent and humane working conditions. The Code’s standards are based on national law and accepted good labour practices.

Companies affiliated with the PCU are expected to comply with all relevant and applicable laws and regulations of the country in which workers are employed and to implement the Workplace Code in their applicable facilities. When differences or conflicts in standards arise, affiliated companies are expected to apply the highest standard.

The PCU monitors compliance with the Workplace Code by carefully examining adherence to the Compliance Benchmarks and the Principles of Monitoring. The Compliance Benchmarks identify specific requirements for meeting each Code standard, while the Principles of Monitoring guide the assessment of compliance. The PCU expects affiliated companies to make improvements when Code standards are not met and to develop sustainable mechanisms to ensure ongoing compliance.

The PCU provides a model of collaboration, accountability, and transparency and serves as a catalyst for positive change in workplace conditions. As an organization that promotes continuous improvement, the PCU strives to be a global leader in establishing best practices for respectful and ethical treatment of workers, and in promoting sustainable conditions through which workers earn fair wages in safe and healthy workplaces.

Employment Relationship
Employers shall adopt and adhere to rules and conditions of employment that respect workers and, at a minimum, safeguard their rights under national and international labour and social security laws and regulations.

Non-discrimination
No person shall be subject to any discrimination in employment, including hiring, compensation, advancement, discipline, termination or retirement, on the basis of gender, race, religion, age, disability, sexual orientation, nationality, political opinion, social group or ethnic origin.

Harassment or Abuse
Every worker shall be treated with respect and dignity. No worker shall be subject to any physical, sexual, psychological or verbal harassment or abuse.

Forced Labour
There shall be no use of forced labour, including bonded labour or other forms of forced labour.

Child Labour
No person shall be employed under the age of 18

Freedom of Association and Collective Bargaining
Employers shall recognize and respect the right of workers to freedom of association and collective bargaining.
**Health, Safety and Environment**

Employers shall provide a safe and healthy workplace setting to prevent accidents and injury to health arising out of, linked with, or occurring in the course of work or as a result of the operation of employers’ facilities. Employers shall adopt responsible measures to mitigate the negative impacts that the workplace has on the environment.

**Hours of Work**

Employers shall not require workers to work more than the regular and overtime hours allowed by the law of the country. The regular workweek shall not exceed 48 hours. Employers shall allow workers at least 24 consecutive hours of rest in every seven-day period. All overtime work shall be consensual. Employers shall not request overtime on a regular basis and shall compensate all overtime work at a premium rate. Other than in exceptional circumstances, the sum of regular and overtime hours in a week shall not exceed 72 hours.

**Compensation**

Every worker has a right to compensation for a regular workweek that is sufficient to meet the worker’s basic needs and provide some discretionary income. Employers shall pay at least the minimum wage or the appropriate prevailing wage, whichever is higher, comply with all legal requirements on wages, and provide any fringe benefits required by law or contract. Where compensation does not meet workers’ basic needs and provide some discretionary income, each employer shall work with the PCU to take appropriate actions that seek to progressively realize a level of compensation that does.
