GUIDE TO THE WORLD BANK MONTHLY OPERATIONAL SUMMARY

The World Bank Monthly Operational Summary (MOS) reports on the status of projects in the World Bank’s pipeline from the time the operation is identified to the signing of the Loan, Credit, or Grant Agreement. It is a detailed accounting of the projects included in the country lending programs that are actively being prepared for implementation. The lending programs reflect the Bank’s strategy for each member country as set out in the Country Partnership Framework (CPF) presented to the Board of Executive Directors of the World Bank. On average, it takes about 13 months for the Bank to process a project from concept to approval. After a financing agreement is signed or a project is dropped from the program, the project entry is deleted from this summary. Each issue of the summary contains a list of projects reported for the first time and the list of projects deleted from the current issue. Familiarity with the Bank’s project cycle, summarized in the following paragraphs, can help potential bidders identify business opportunities with Bank borrowers. Each entry in the MOS indicates at what point the operation is in the project cycle.

Project Cycle

During IDENTIFICATION, the client government and the Bank identify a specific operation as being likely to support the country’s development strategy and the Bank’s CPF.

During PREPARATION, the client government identifies and discusses the technical and institutional alternatives for achieving the objectives of a project. Preparation usually requires feasibility studies followed by more detailed studies of the alternatives that promise to yield the most satisfactory results. An environmental assessment is usually carried out during this phase. (See below for more information on environmental assessment.) In the preparation stage of the project cycle, clients often supplement their own efforts by hiring consultants to carry out a major part of the work. Contractors and suppliers of equipment and goods need to start making contacts with country officials during this stage.

During APPRAISAL, the Bank conducts a comprehensive review of all aspects of the project (technical, institutional, economic, and financial), laying the foundation for implementing the project and evaluating it when completed. Project appraisal is conducted by Bank staff and may be supplemented by individual experts. The preparation of the Project Appraisal Document concludes this stage.

During NEGOTIATIONS, discussions are held with the client government, and the agreements reached are written into the loan documents. Upon completion of negotiations, the project is presented to the Bank’s Board of Executive Directors for approval. After approval, the financing agreement is signed.

Project IMPLEMENTATION normally starts within a few months after the project financing agreement is signed. Countries, through their implementing agencies, have full responsibility for executing World Bank-financed projects, including procuring goods and works and hiring consultants. Contractors and suppliers, therefore, should contact appropriate officials of the implementing agency to express their interest in specific projects and obtain information on what goods and services will be needed and when and how to submit bids and proposals.

Consultants are often used during project implementation to provide technical assistance and other project implementation support. Consultants in particular should contact the responsible implementing agency early in the project preparation period to express their interest. Contracts for consulting services, as well as some for goods and works, may also be procured prior to loan/credit/grant approval. This is known as advance contracting.

The information contained in the MOS is intended to enable companies to assess their interest in supplying Bank-financed projects. Further information should be requested from the country’s project implementing agency. The likelihood of a timely response is greater if the queries are brief and to the point. When possible, travel to the country; direct contact with relevant agency officials is recommended.

Firms should contact the World Bank only if they are unable to obtain a response to their queries from the implementing agency. General information about business opportunities under Bank loans, credits, and grants may be obtained from the World Bank’s Procurement Policy and Services Group’s website at http://www.worldbank.org/en/projects-operations/products-and-services/procurement-projects-programs and (click on “Browse Contract Awards and Notices by Country” in the Related Links at the bottom of the webpage).

Business opportunities under World Bank-financed appear twice a month in UN Development Business and are available via the internet at
https://www.devbusiness.com/. The website also includes invitations to bid and submit proposals, notices of contract awards, and General Procurement Notices.

**Environmental Categories**

The type, timing, and scope of environmental analysis to be performed by Bank clients are confirmed when a given project is identified. Projects are assigned one of the following categories, depending on the nature, magnitude, and sensitivity of environmental issues:

**Category A:** The project may have adverse and significant environmental impacts. Full environmental assessment is normally required.

**Category B:** The project may have specific environmental issues. Partial environmental assessment is normally required.

**Category C:** Likely to have minimal or no adverse environmental impacts. Beyond screening, no further EA action is required.

**Category FI:** Involves investment of Bank funds through a financial intermediary, in subprojects that have adverse environmental impacts. An environmental framework may be required.

**Category U:** No category given.

The World Bank has three basic lending instruments: (ii) Investment Project Finance which provides financial support for goods, works and services for a pre-defined specific project; (ii) Development Policy Finance (DPF) which supports countries’ policy and institutional reforms in a sector or the economy as a whole and provides quick-disbursing budget support; and (iii) Program-for-Results (PforR) which finances parts of a larger government program, with disbursements linked to results or performance indicators. DPF and PforR operations are not included in the MOS because these instruments are not designed to provide procurement opportunities since the funds are disbursed directly to government accounts.

**A typical summary entry looks like this:**

**MOS: A Typical Record**

1. Name of client country
2. Sector
3. (R) = revised; (N) = new entry
4. Project description
5. Italics indicate change from last month’s listing
6. PID=project identification number
7. Amount of financing in US$millions (source)
8. Name/address of implementing agency

**The Global Environment Facility (GEF)**

In addition to projects financed by the World Bank, the *World Bank Monthly Operational Summary* reports on projects financed by the Global Environment Facility (GEF).

The GEF was established in 1991 by a Resolution of the World Bank Executive Directors as a pilot program to assist in the protection of the global environment and to promote environmentally sound and sustainable economic development. The GEF operates as a mechanism for providing new and additional grant and concessional funding to meet the agreed incremental costs of measures to achieve agreed global environmental benefits in the focal areas of climate change, biodiversity, international waters, land degradation chemicals, sustainable forest management (SFM)/REDD+, and under the Least Developed Countries Fund (LDCF) and the Special Climate Change Fund—adaptation to climate change. The GEF consists of an Assembly of 183 participating countries, a Council, a Secretariat a Scientific and Technical Advisory Panel, and 18 Implementing Agencies – ADB, AfDB, BOAD, CAF, CI, DBSA, EBRD, FAO, FECO, FUNBIO, IADB, IFAD, IUCN, UNDP, UNEP, UNIDO, WBG, and WWF.
As one of the Implementing Agencies of the GEF, the World Bank assists its member countries conserve and sustainably use their biological diversity, reduce their emissions of greenhouse gases and adapt to climate change, manage shared water bodies and reduce their emissions of ozone-depleting substances by accessing GEF resources to cover the incremental costs of additional actions on these global issues.

To be eligible for GEF co-financing, projects must be consistent with at least one of the GEF’s ‘Operational Programs’ and meet the GEF project eligibility criteria.

For additional information on the GEF, contact the GEF secretariat or visit its website: www.thegef.org/gef

**Governance**

**Economic Governance Technical Assistance - AF:** 1. Comoros’ three islands form one of the smallest African countries. With an estimated 760,000 inhabitants, spread among three islands, the country remains mired in poverty. Gross Domestic Product (GDP) per capita is estimated at US$785 and, based on 2004 estimates, about 45 percent of the population lived below the poverty line, an incidence that has probably increased since then. Poverty incidence varies considerably across regions and is typically higher in rural areas and on the island of Anjouan. The primary sector of the economy (mainly subsistence agriculture, a few cash crops, and fisheries) and retail services dominate the economy, representing about one-half and one-fifth of the country’s GDP, respectively. Cash crops comprise mainly three high-value export crops - vanilla, cloves and ylang-ylang - and constitute most of the export earnings in goods, equivalent to a mere 4 percent of GDP. The third largest sector is government services, representing about 10 percent of GDP. Despite the potential in tourism, the country has failed so far to tap into the growing role of this sector in the region. With longstanding outmigration, the country benefits from large and growing remittances at close to 20 percent of GDP from the Comorian diaspora, mainly in France. The diaspora also represents the main source of visitors from abroad. 2. Confirming a new commitment to reform, the Union of the Comoros adopted a Poverty Reduction Strategy Paper (PRSP) for the period 2010-2014, which was endorsed by partners, including the World Bank. The strategy has the following core objectives: (i) stabilize the economy and lay the groundwork for strong and equitable growth; (ii) strengthen key sectors by focusing on institution-building and ensuring a broader role for the private sector; (iii) strengthen governance and social cohesion; (iv) improve the health status of the general public; (v) support education and vocational training with the aim of developing human capital; and (vi) promote environmental sustainability and civil security. 3. In support of its PRSP, the government has finalized a comprehensive Public Financial Management strategy for the coming decade (2010-19) and adopted a detailed Action Plan for 2010-12. The proposed strategy is organized around four pillars: (i) modernizing the legislative and regulatory framework and strengthening institutional capacity; (ii) rationalizing budget preparation; (iii) strengthening budget execution; and (iv) increasing transparency.
through improved internal and external controls. The action plan (the first in a series of rolling triennial plans) provides a detailed, sequenced and budgeted list of actions mapped to specific lead institutions within the administration. Its implementation relies on two committees that include Union and island representatives: the CREF (which acts as a secretariat of the Comité Budgétaire) that is responsible for the implementation as well as monitoring and evaluation of the national PFM reform strategy, and the HASC that is in charge of leading the civil service reform, including management of personnel rosters, new recruitments into the civil service and implementation of the organic frameworks. 4. Notwithstanding this new dynamism for PFM reforms, important challenges remain. The 2007 Public Expenditure and Financial Assessment (PEFA) review rated Comoros at the lowest possible score, on 22 out of 28 key indicators. This evaluation emphasized weaknesses at all levels of public financial management (from formal institutions and procedures to actual implementation and processes), and puts Comoros squarely in the 'lower performance league' of African countries. 5. Major weaknesses contribute to reduce the Government's efficiency in terms of budget preparation, execution, and reporting. Despite recent improvements and efforts to enhance cooperation via the Comité Budgétaire, budget preparation remains nonparticipatory with consultations between Union and Islands fragmentary and unstructured. As a result, the budget is established mainly on the basis of economic and financial constraints, and is largely disconnected from policy priorities. With revenues barely covering wages and recurrent expenditures, there is limited scope for using the budget as a tool for resource allocations. In addition, the budgetary nomenclature is still based on administrative classifications and does not permit establishing a direct link between the budget (preparation and monitoring) and the government’s policy priorities or tracking priority expenditures through the budget cycle. With respect to execution, the legal and procedural framework is outdated and moreover poorly understood even by those in charge of the administrative phase of execution (credit managers). As a result normal procedures are often circumvented through a proliferation of exceptional procedures and significant gaps appear between budgeted and actual amounts. Thus the informational and authorization functions of the budget are severely undermined. At the Treasury level, serious structural weaknesses were again compounded during the reconciliation period, which saw a breakdown in communication and systems across levels of Government. As a result key public accounts documents are simply never produced. 6. PFM information systems and financial control mechanisms are generally rudimentary and obsolete, and lack an integrated financial management information system. Except for the recently implemented ASYCUDA++ for customs operations, the only systems in place are software applications for wage bill calculation and external debt management. 7. Comoros' civil service absorbs an inordinate share of the Government’s resources, while delivering poor quality services to the population. During the period of decentralization, most central administrative structures were simply duplicated in each autonomous island (without regard for administrative efficiency or financial sustainability). Correspondingly the civil service roster increased from less than 6,000 in 1999 to some 12,000 in 2008, with a concomitant rise of wage and salaries expenditures from 6.2 to 9 percent of Gross Domestic Product (GDP), a loss of institutional memory and a dilution of already scarce human resources. Moreover, the often discretionary nature of these appointments has weakened the significance of positions and job descriptions within each public institution. 8. The government has taken steps to improve the effectiveness of public administration and gradually reduce the wage bill, but much remains to be done. The HASC has supervised the establishment of a unified computerized civil service roster (for the Union and Islands) and contracted the development of an integrated civil service and wage management software. It has also carried out a vast review of the existing organizational structures of each administration (cadres organiques) an updated version of which has been adopted by Parliament in 2010 and will be gradually implemented. Nevertheless, there are numerous remaining challenges. For example, the civil service roster will only become a useful management tool once a physical census of all civil servants has been completed to clean up and validate the data. Also, much work is needed to develop feasible strategies for implementing the new organizational structures over time and with due consideration for social consequences. 9. In January 31 2011, the Bank approved a grant in the amount of SDR 1.2 million (USD 1.8 million equivalent) to support the country’s PFM and civil service reform programs. The original project development objectives are (i) to increase the efficiency, accountability and transparency of public financial management and (ii) to improve the management of civil service human resources and wages. The disbursement percentage as of December 18, 2012 is about 67%. 10. A midterm performance review was conducted in March 2012 and followed by supervision mission in October 2012. Overall, progress towards achieving the PDOs and implementation progress of the activities were found satisfactory. However, the team noted a financing gap of about $1.5 million to implement the remaining activities of the project, including the PFM information system and the implementation of the recommendations of the HR assessments and reviews (physical census of the civil servants, wages paid by checks, organic frameworks). In addition, the policy dialogue with the Ministry of Finance highlighted the weak macroeconomic management capacities which undermine the country’s ability to formulate expenditure policy decisions based on sound assumptions and data. To address this challenge, the authorities have requested the Bank’s support to conduct economic management studies to inform budget preparation processes and sectoral analysis. 12. The purpose of the additional financing is to support the implementation of those activities. More specifically, the additional activities are following: (i) Acquire and roll out a system covering budget preparation, budget execution, and accounting and reporting; (ii) design and build the required network (LAN and WAN) so that the module could be used by the Treasury services throughout the territory (iii) support the implementation of the HR assess-
ments and reviews (physical census of the civil servants, wages paid by checks, organic frameworks) (iv) economic management studies to inform budget preparation processes and sectoral analysis. 13. Moreover, the original date closing date is set for December 31, 2013. According to the IT master plan, the acquisition and roll out of the budget and accounting system would take up to 18 months. Therefore an extension of the closing date of the parent project is proposed until December 31, 2015. 14. No other changes are proposed to the project’s development objectives as the additional activities fit within the originally conceived objectives. Approval completed on 12 November 2013. Environmental Assessment Category C. US$ 3.5 (IDA Credit). Consultants will be required. Nigeria Rural Access and Agricultural Marketing Project: The objective of the proposed Nigeria Rural Access and Agricultural Marketing (RAAMP) is to improve rural access and agricultural marketing in selected participating states, whilst enhancing sustainability of the rural and state road network.

13. This operation is the successor of the Second Rural Access and Mobility Project (RAMP 2-P095003) designed to enhance the impact of the rural access initiative in improving agricultural productivity and value chain, as well as income and competitiveness of small family farmers. The focus on connecting rural communities to local agricultural markets - roadside agro-logistics hubs – to support the ongoing agricultural transformation initiative makes RAAMP unique from its predecessors. RAAMP will facilitate the provision of services that will enhance agricultural productivity, help build rural agricultural value chains, and help producers market agricultural products competitively. RAAMP will build on its successor, RAMP 2, by incorporating agricultural marketing/agro-logistics services. The project also proposes adopting an innovative output-based approach to help the states function as full-fledged implementing entities capable of implementing development partners’ support. Nigeria Green Belt Corridors Development Program: The proposed Program Development Objective (PDO)of the Nigeria green belt corridors development program is to improve transport and trade connectivity and facilitate market integration along Nigeria’s key economic corridors.
This is a multi-sectoral complex and long-term undertaking that requires adopting a multiphase programmatic instrument/approach (MPA). The Government of Nigeria (GON) has requested financing for the improvement of critical road infrastructure and logistics services along the economic corridors spread in the gateway states, south eastern region, north western region and River Nile corridor. The request includes 23 road projects with a total length of about 2,400km. The investment requirement for the urban renewal is anticipated to be high. Private investment is required to operationalize the SEZs and establish commodity exchange centers. Therefore, the proposed program will be implemented in phases.

This MPA will support an integrated approach to economic corridor development with a focus on: i) upgrading priority transport corridors at the national and sub-national levels; ii) improving logistics infrastructure and services; and iii) creating an enabling environment for private investment.

Phase 1 will focus on improving priority transport corridors at the national and sub-national levels, whilst developing the interventions that will support the economic transformation by addressing key regulatory gaps along the economic corridors.

Phases 2 and 3 will expand the support for spatial transformation and regional economic integration through the development of economic development corridors and other complementary interventions with multi-sectoral interventions at national and sub-national levels.

Forum for Agricultural Research in Africa MDTF - Additional Financing: This is a request for an extension of and additional financing for the ongoing Forum for Agricultural Research in Africa (FARA) Multi-Donor Trust Fund (MDTF) (P1126840/TF071192). It is currently financed by the Canadian International Development Agency (CIDA), UK’s Department for International Development (DFID); the European Commission (EC); and The Netherlands, and managed by the Agriculture, Rural Development and Irrigation unit (AFTA2). FARA has been operating on a 10-year Strategic Plan (2007-2016) developed to add value to the support provided by the sub-regional organizations (SROs) to strengthen African National Agricultural Research Systems (NARS). The strategy was designed to be implemented in 2 five year phases with corresponding Medium Term Operational Plans (MTOPs) which detail implementation of the strategy. Due to delays in obtaining donor funding under the original MDTF, the Strategic Plan period was adjusted to cover the period 2009-2018. The FARA MDTF was established at the World Bank in 2009 to support the first phase of the strategic plan, MTOP I (2009-2013). It has been under implementation for the past three and a half years and implementation has been satisfactory. It is scheduled to close on December 31, 2013. Several of the MDTF participating donors are in favor of and have recommended a 5-year extension of the MDTF (in line with the Bank’s revised guidelines on extension of closing dates, April 2013) to support a smooth transition to FARA’s second MTOP (2014-2018). The associated proposed Additional Financing would support implementation of MTOP II. Initial confirmed funding to launch implementation has already been secured from one donor. Approval completed on 13 December 2013. Environmental Assessment Category B. US$ 20.0 (CDP4). Consulting services to be determined. Forum for Agricultural Research in Africa (FARA) Tel: (233-302) 772-823, E-mail: yakinbamijo@fara-africa.org, Contact: Dr. Yemi Akinbamijo, Executive Director.

Association for Strengthening Agricultural Research in East and Central Africa Multi-Donor Trust Fund: This is a request for Additional Financing to support the existing ASARECA MDTF (P112600, TF071104). A Multi-Donor...
Trust Fund (MDTF) was established at the World Bank in 2008 to support a program of integrated agricultural research for development, as described in ASARECA's 5-year OP (2008/09-2013/14). The MDTF is intended to facilitate donor interaction, coordination and harmonization (including harmonization of procedures and formats to be applied by ASARECA), which is essential to effectively and efficiently assist the further institutional development of ASARECA. The project has been under implementation for the past 3.5 years and implementation progress has been satisfactory. Original donor pledges were expected to reach $55 million and this target has been met. New contributions totaling $4 million will be used to scale up the results of existing sub-projects within the remaining timeframe of the grant (19 months). No new activities are planned. Identification completed on 21 May 2012. Environmental Assessment Category B. US$ 5.6 (CDP4). Consulting services to be determined. Association for Strengthening Agricultural Research in Eastern and Central Africa (ASARECA), Contact: Seyfu Ketema, Executive Director.

**Association for Strengthening Agricultural Research in East and Central Africa Multi Donor Trust Fund:**
This is a request for an extension of and additional financing for the ongoing Association for Strengthening Agricultural Research in Eastern and Central Africa (ASARECA) Multi-Donor Trust Fund (MDTF) (P112600/TF071104). It is currently financed by the Canadian International Development Agency (CIDA), UK's Department for International Development (DFID); the European Commission (EC); and United States Agency for International Development (USAID), and managed by the Agriculture, Rural Development and Irrigation unit (AFITA). ASARECA, a sub-regional not-for-profit association has been operating based on a 10 year Strategic Plan (2008-2018) developed to support the sustainable competitiveness of Eastern and Central Africa agricultural research systems through support to prioritized areas of research for development. The strategy was designed to be implemented in 2 five year phases with corresponding Medium Term Operational Plans (MTOPs) which detail implementation of the strategy. The ASARECA MDTF was established at the World Bank in 2008 to support the first phase of the strategic plan, OPI (2008-2013). It has been under implementation for the past 4 and a half years and implementation has been satisfactory. It is scheduled to close on December 31, 2013. Donor support has been very strong for the OPI. Original donor pledges totaled $55 million. This target was not only met, but exceeded following an additional contribution of $5.6 million in the second half of 2012. Total contributions to date have passed $60 million. A number of the MDTF participating donors are in favor of and have recommended a 5 year extension of the MDTF to support a smooth transition to ASARECA’s second MTOP (OPII) (2014-2018). The associated proposed Additional Financing would support implementation of OPII. Initial confirmed funding to launch implementation has already been secured from two donors. Identification completed on 23 July 2013. Environmental Assessment Category B. US$ 30.0 (CDF4). Consulting services to be determined. Implementing agency(ies) to be determined.

**Macroeconomics, Trade and Investment**

**AFCC2/RI-Great Lakes Trade Facilitation - SOP2:** The development objective is to enhance the capacity for commerce and improve processes and conditions for cross-border trade at targeted border locations in the GLR

The "Capacity for commerce in the context of this project is defined as the capacity of core trade infrastructure, such as border markets, border facilities, and ports, to handle an increased flow of goods, services, and people, and the capacity of government agencies at the border to provide high quality and efficient services. Service providers include those individuals who directly support the immediate cross-border trade value chains, including, among others, market vendors in border markets, transporters, and government agents. The assumption is that improving the adequacy of trade infrastructure, simplifying and improving border processing procedures (including standards for treatment), and enhancing the knowledge and capacity of traders and border officials would lead to reduced trade costs (be they material and immaterial, the latter related to harassment and waste of time) that the target-groups have to bear each time they cross the border. Taken together, and in the absence of any other factors of influence that are not under the control of the project (such as conflict, disaster, major political and/or economic crisis), these project outcomes would help increase the volume of goods traded through the respective border posts/crossing points and improve the livelihoods of those involved in the cross-border value chains in the sub-region. Concept completed on 30 September 2016. Environmental Assessment Category B. Project: P155329. US$ 37.0/23.0 (IDA Credit/IDA Grant). Consultants will be required. Ministry of Commerce.

Digital Transformation for User-Centric Public Services: Improve the access to and the quality of priority services for citizens in Tunisia.

“Access” will be measured based on standard measures of service coverage; and will also include measurement of an aspect of service delivery “inclusion” by disaggregating access by focal population (women, youth) and focal geographical areas.

“Quality” will be unpacked along the following dimensions: (i) delivery performance indicators (for example, efficiency measures (for example, time and/or cost and/or targeting); (ii) user satisfaction; and, (iii) gains in accountability (for example, reduced corruption).

Priority services/activities (as described below) were selected based on a participatory problem-driven approach and based on key criteria: (i) relevance of the service/activity for addressing fiscal/socio-economic reform priorities and digital transformation; (ii) impact and relevance for the users (as measured by impact figures, user priority life events and current problems of access/quality in the service area); and, (iii) the need for financing (i.e. lacking current financing/donor support); (iv) the feasibility and degree of readiness of the service.

Targeted region(s) may be identified in preparation but is most likely to focus on the least served lagging regions of the south/interior. Concept completed on 16 November 2018. Project: P168425. US$100.0 (IBRD). Consultants will be required. Ministry of Technology Information and Communication.

Education

Secondary Education Quality and Access Enhancement Project - AF: The Project Development Objective in the proposed AF operation will remain unchanged and will continue to be "to improve the quality of secondary education, systematically monitor learning outcomes, and to increase access and equity in project upazilas". The four project components will be the same as in the original project. The proposed AF would: (i) support the implementation of the expanded project activities (across more schools and students within SEQAEP upazilas) to deepen the impact of a well-performing project; (ii) allow adequate time for MOE to evaluate and institutionalize successful interventions from the ongoing project under a more harmonized secondary education sector program that GOB is planning to initiate by early 2017; and (iii) initiate replication of successful activities beyond 125 SEQAEP upazilas in a phased manner for a smoother institutionalization of SEQAEP interventions. The AF would also extend the Closing Date of the current SEQAEP project from June 30, 2014 to December 31, 2016 in order to carry out the proposed activities. Approval completed on 3 December 2013. Environmental Assessment Category B. US$ 265.0 (IDA Credit). Consultants will be required. Additional Financing for Reaching Out of School Children II: The key project development objective is to improve equitable access, retention and completion in quality primary education for out-of-school children in selected under-served areas. Approval completed on 19 September 2018. Environmental Assessment Category B. US$ 4.2/20.8 (IDA Credit/IDA Grant). Consultants will be required. Ministry of Primary and Mass Education (MoPME).

Additional Financing: Skills and Training Enhancement Project: The Additional Financing will support the original four components of the Skills and Training Enhancement Project to further contribute towards scaling up ongoing institutional grants to additional public and private institutions to meet the ongoing demand and to fill in the funding gap in the stipend activities. Following are the components under the Additional Financing: Component 1: Improve the Quality and Relevance of Training: This component will be implemented through two (2) windows. Window I will support selected additional private institutions offering diploma level programs. These institutions will be chosen on the basis of well-defined eligibility and selection criteria. Window II will support selected additional institutions providing short-term vocational and technical training. These institutions will be chosen based on similar eligibility and selection criteria employed under Window I. Component 2 - Pilots in Technical and Vocational Education and Training: Developing pilot activities aimed at strengthening the overall technical and vocational educational training system: Supporting Industry Skills Councils (ISC) and the National Skills Development Council (NSDC) by providing a grant financing and operational cost support to finance establishment of specific offices to about two to four ISCs and NSDC who will guide the overall regulatory and legislative framework for Vocational Education and Training and skills development. Component 3 - Institutional Capacity Development: Strengthening the capacity of the Recipient in managing the TVET sector as a whole by way of institutional capacity development of the Directorate of Technical Education (DTE), the Bangladesh Technical Education Board (BTEB) under the Ministry of Education (MoE), and the Bureau of Manpower Employment and Training (BMET) under the Ministry of Expatriate Welfare and Overseas Employment (MOEWOE) program. Component 4 - Project Management, Communications, Monitoring and Evaluation Support for project management, monitoring and evaluation of Project progress and outcomes. Approval completed on 26 September 2013. Environmental Assessment Category B. US$ 16.7 (FSSA). Consulting services to be determined. Ministry of Education Tel: (88-02) 911-0664, E-mail: techedu09@gmail.com, Contact: Directorate of Technical Education, Director General.

BD Higher Education Quality Enhancement Project - AF: The Higher Education Quality Enhancement Project (HEEQEP) was approved in March 2009 and the main objective of the project is to improve the quality and relevance of the teaching and research environment in higher education institution through encouraging both innovation and accountability within universities and by enhancing the technical and institutional capacity of the higher education sector. Additional Financing has been proposed to fill the funding gap to effectively complete the agreed project activities; expansion of project interventions in order to scale up project impact and development effectiveness is warranted based on the likelihood of achieving project objective and strong project performance. The following components/activities have been proposed with additional financing of US$60.0 million: (i) Component 1: Promoting Academic Innovation; (ii) Component 2: Building Institutional Capacity of Tertiary Education Sector; (iii) Component 3: Raising the Connectivity Capacity in the Higher Education Sector (BdREN & Digital Library); (iv) Component 4: Establishment of Quality Assurance Mechanism; and (v) Component 5: Project Management and Monitoring and Evaluation. Component 1: Promoting Academic Innovation Sub-Component 1.1 - Financing to cover the shortage of funds for the 1st and 2nd rounds AIF. The additional financing will provide funds for the first and second rounds AIF sub-projects which are under implementation. The shortage was created when the Project needed to temporarily reallocate the funds to the BdREN activities under Component 3 during the restructuring. Sub-Component 1.2 - Third round of AIF The AIF will allocate its resources through three competitive windows: (i) improvement of teaching and learning; (ii) enhancement of research capabilities; and (iii) university-wide innovations which include campus network. In order to place additional emphasis on innovation for teaching and learning (Window 1) and research (Window 2), selection criteria will be modified. Established proposal evaluation process will be followed with minor modifications based on the lessons learned from the first and second rounds AIF which will be reflected in a revised AIF Operations Manual. Component 2: Building Institutional Capacity of Tertiary Education Sector: This component aims to further strengthen the capacity of UGC, MOE and Higher Education Institutions for the future development of the sector. To this end, the project will support the policy formation based on the studied carried out under the original project. Component 3: Raising the Connectivity Capacity of the Higher Education Sector Sub-component 3.1: Strengthening BdREN connectivity: Basic connectivity through overhead dark fibre would be established by December 2013. To use the full potential of the connectivity campus network would be established for the remaining 20 public universities. In addition, VC facilities using the
BdREN connectivity could be established in the Ministry of Education, ERD, and Planning Commission. Provisions would be made available for add-on software including cloud-computing and equipment for performance enhancement. Sub-component 3.2: Awareness building and knowledge exchange: Awareness raising and knowledge exchanges on best practice for the ownership, governance and exploitation of an NREN for the stakeholders of BdREN. The exchange programs could include: (a) Policy level knowledge exchange among the "South" and "North" countries; (b) academic and technical level knowledge exchange with the neighboring countries in Asia Pacific mainly on grid computing, climate modeling, medical imaging etc. Sub-component 3.3: Capacity building (technical and financial management): Additional staffing and technical training of IT personnel at network and campus level - Local training programs for university IT staff on campus networking in association with international providers to create a national capacity to provide such training. A system of scholarships/fellowship or international placements would be provided for specialist training of IT personnel in campus networking with the aim of building a training team for the country. Sub-component 3.4: Application development to maximize the utilization of BdREN: Additional support would be necessary for ensuring (a) enhancement of digital library access, (b) partnership with regional and continental RENs, and (c) utilization "pump-priming" activities in (i) education, (2) research collaboration, and (c) campus safety. Component 4: Establishment of Quality Assurance Mechanism To build on the momentum generated under the first two rounds of AIF and the recent efforts made in developing a national quality assurance mechanism, the Project would support the following activities with the proposed additional financing: (i) establishment of Quality Assurance and Accreditation Council of Bangladesh (QAAC); and (ii) establishment of Institutional Quality Assurance Cells (IQAC).

Sub-component 4.1: Establishment Quality Assurance and Accreditation Council of Bangladesh The objective of this sub-component is to provide funds for the establishment of Quality Assurance and Accreditation Council of Bangladesh and the development of Regulations, Qualification Framework, and Quality Assurance Manual. Additional funds will be also provided for awareness campaigns and necessary capacity building activities. Sub-component 4.2: Establishment of Institutional Quality Assurance Cells The Fund will finance the establishment and operation of (i) Institutional Quality Assurance Cells (IQACs); (ii) establishment of institutional data collection and analysis mechanism for systematic collecting, processing and dissemination of reliable data concerning higher education quality assurance as well as graduates' performance in the labor market; (iii) preparation of self-assessment, process facilitation and necessary training, external peer reviewers' visits, and preparation and implementation of Institutional Improvement Plan. Details of the implementation mechanism for this fund will be laid out in the Operations Manual. Component 5: Project Management and Monitoring and Evaluation The objective of this component is to ensure proper implementation, management, and monitoring and evaluation of scaled up activities under the project. It would comprise two sub-components, aiming to reach this objective namely: (i) project management; and (ii) monitoring and evaluation. Approval completed on 3 December 2013. Environmental Assessment Category B. Project: P145749. US$ 125.0 (IDA Credit). Consulting services to be determined.
